

On-Farm Greenhouse Gas Mitigation Field Day

Come along and hear the results of research into greenhouse gas mitigations on a multi-enterprise farming operation.

A range of modelling work has been carried out as to possible GHG mitigations on individual dairy and sheep & beef farms, and across the enterprise as a whole. This analysed both the effectiveness of the mitigation in reducing GHGs, and the impact on farm profitability.

The results of this will be presented at 2 field days:

May 15: Onuku Maori Lands Trust – Woolshed at 96 Rerewhakaaitu Road
Rerewhakaaitu

May 29: Te Uranga B2 Incorporation – Woolshed at 550 Ngakonui-Ongarue Road
Taumarunui

Time: 12.30pm to 3.30pm

Tea/coffee and finger food available at 12.30

Agenda:

Whakatau/Welcome – farm owners
Outline of research project – Tanira Kingi, Scion
Research results – Phil Journeaux, AgFirst
Comment by farm owners on the research
