

How to improve the hoof health of your dairy cows?

Gain knowledge and practical skills.

Lameness is now amongst the top three health issues on-farm and it is costing New Zealand dairy farmers millions of dollars every year.

LAMENESS MANAGEMENT WORKSHOP

What you will learn?

- Anatomy and function of the hoof
- Animal management and its impact on lameness
- Safe trimming techniques
- 5 Step Process of hoof trimming according to the Dutch Method

Outline:

This workshop is designed to give students an overview of issues relating to lameness management and introduce them to the 5 step trimming process according to the Dutch Method. The workshop has both theory and practical aspects, so bring your gumboots, overalls, warm clothing, lunch and refreshments. Certificate on full attendance.

On-farm group course
- up to 8 people \$2,200*
- up to 10 people \$2600*

*All pricing plus GST.

[^] Per person

"It is a really good way to learn all of the things that contribute to lameness and it is explained very well. It also helps to be able to do the practical section and know that someone is there to guide you"

- Margot, Gore

"You have no idea how lameness works - do the course. It will change your mind!"

- Johan, Morrinsville

"Very good, I like Fred's view on feeding and the health of the hoof"

- Kieryn, Otautau
