

# DETAINMENT BUND FIELD DAY

**Location:** Hodderville Farms Events Centre, 974 Old Taupo Road, Waotu 3481

Whether you're curious about how detainment bunds work or considering installing one (or more) on your own farm, this field day is a valuable opportunity to learn from experts and view real examples in the paddock. Discover how these structures can help reduce flood impacts and support improved environmental outcomes. Join us for a relaxed lunch with fellow landowners and discuss how we can add another practical tool to the toolbox - enhancing environmental performance without sacrificing productive land.

**Date:** February 17<sup>th</sup> 2026

**Time:** 11am - 2pm (Approximate finish time)

## **Speaker: John Paterson**

John Paterson is a qualified geologist and has developed 'The Detainment Bund' PS120 (DB) to effectively intercept and treat stormwater runoff from farms. John will talk about this innovation journey of environmental stewardship and new mitigation development to help farmers improve water quality.

**Lunch  
INCLUDED**

**Waikato River  
Authority**

## **Registration is essential**

Please email [apaget@hoddervillefarms.com](mailto:apaget@hoddervillefarms.com) to register your interest or for more information

**This project was made possible with funding support  
from the Waikato River Authority and Pokaiwhenua  
Catchment Group**
