Visit Us for an Exciting On Farm Tech Showcase!

AIMER, Bovonic, and Herd-i have teamed up to host a special event highlighting the latest technology available to New Zealand dairy farmers.

Discover the future of dairy technology, from Herd-i's cutting-edge machine-vision system for automated lameness and body condition scoring, to Bovonic's unique in-line QuadSense mastitis detection, and Aimer Farming's innovative smartphone pasture measurement and artificial intelligence powered management. Discover how smart technology is enhancing farm productivity, animal health, and informed decision-making.

Bring your team, bring your neighbour, and come see how cutting-edge technology can help drive the future of your farming system.
